

# Video Capturing and Archive

# 4K/2K/HD Video Capture pure Fibre

## Video Capture:

Provide 4K/2K Video Capture performance direct to dedicated workstation for high performance capturing work.

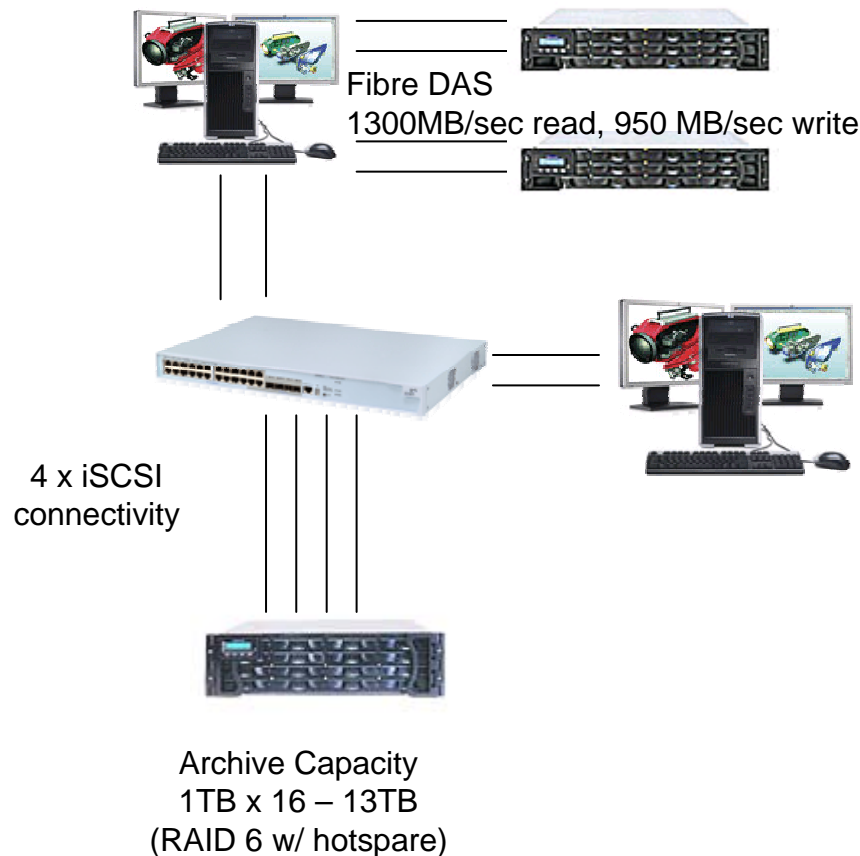

Bluefish 444 certifies that performance for high end film is guaranteed. SAN Running on either StorNextFS or MelioFS to provide high performance and dynamic storage growth, best practiced by the video industry.

Video capturing performance can increase by adding more RAID units

## Archive:

Using 1 or multiples of RAID units to provide dynamic archive capacity

# 4K/2K Video Capture Simplified

## Video Capture:

Provide 4K/2K Video Capture performance direct to dedicated workstation for high performance capturing work.

Bluefish 444 certifies that performance for high end film is guaranteed.

## Archive:

With MPIO on 4x GigE connectivity with iSCSI, the system is able to throughput upto 140MB/sec ~ 280MB/sec.
